WSL-45 Clear Water Based Sealer

DESCRIPTION:

WSL-45 is a clear, water born, air drying, clear lacquer, which is recommended for use on all types of concretes, bricks, marbles, etc. **WSL-45** dries to a crystal clear finish providing a penetrating seal coat over concrete or brick. **WSL-45** comes in a glossy or flat finish.

ADVANTAGES:

1. Non-flammable, very safe.
2. Excellent corrosion and tarnish protection.
3. Excellent adhesion.
4. Excellent solvent resistance and humidity resistance.
5. Good to excellent stain resistance.
6. Good to excellent hardness.

Operating Conditions:

- Remove any paint, wax, dust or oil from the concrete. Rinse thoroughly with water and allow it to dry.
- **WSL-45 (Glossy or Flat)** is supplied ready to use. Best application method is with a rayon or microfiber mop. Simply drag mop across floor with adequate amounts of **WSL-45**. Apply also with a sponge, roller, brush or spray, using conventional air and airless spray equipment.
- Use a roller to remove excess sealer.
- A second coat can be applied if so desired should be applied once the first layer has dried, typically within 6 hours of applications.

Safety Precautions: Avoid contact with skin, use rubber gloves when handling. Do not take internally. Keep away from children!

Packaging: Available in 1 gallon, 5 gallons or 55 gallons.

TYPICAL PROPERTIES

Appearance:	Milky white emulsion
Total solids, by weight:	25%
pH:	8.0
Non-volatile%:	75%
Freeze/thaw stability:	Keep from freezing
Heat stability, one month, 52 °C:	O.K.
Mechanical Stability:	Excellent
Volatile organic compounds:	Less than 250
Suggested dry film thickness:	.1 mil to 2 mil

CHEMICAL RESISTANCE

.....	A	B	C
Water	10	10	10
Brake fluid	1	1	1
Transmission fluid	9	10	10
Gasoline	3	10	10
Ethanol 50%	2	10	10
Isopropanol	4	10	10
Ethylene glycol	10	10	10

A= Softness 1 = Worst
B= Stain 10 = Best
C= Whitening
